EDUCATION

AJAY KUMAR GARG ENGINEERING COLLEGE
GHAZIABAD (U.P)
Aug 2024 - 2028
8.0/10 CGPA

EXPERIENCE

Machine Learning Intern — Infosys Springboard

Nov 2025 - jan2026
Remote

- Developed an end-to-end Cryptocurrency Price Prediction system using LSTM/RNN and Random Forest models, deployed as a live Streamlit web application.
- Engineered time-series features from historical OHLCV data via Yahoo Finance API; applied sliding-window preprocessing and MinMax normalization for LSTM input sequences.
- Benchmarked multiple models (LSTM, GRU, Random Forest, XGBoost) and selected the best-performing architecture based on RMSE and MAE metrics.

Campus Mantri — GeeksforGeeks

Jan 2026 – May 2026

- Officially appointed as GeeksforGeeks Campus Mantri — selected as a campus tech ambassador to promote coding culture and competitive programming.
- Organised coding contests, algorithm study groups, and placement preparation sessions; developed leadership, time management, and communication skills.

PROJECTS

Smart Agriculture AI System

Live Demo | Source Code

- Architected a multi-module AI platform combining crop recommendation, fertilizer optimization, and plant disease detection deployed live on Hugging Face Spaces via Docker.
- Trained a multi-class crop classifier (7 crop types) on soil NPK, pH, temperature, humidity, and rainfall features; surfaced top-3 predictions with confidence scores using probability calibration.
- Integrated a CNN-based leaf disease detection model supporting 6 crop types (rice, maize, cotton, banana, tomato, potato) with actionable remediation recommendations per detected disease class.

Crypto -future price-predictor model

Live Demo Source Code

- Built an ML-driven web platform for cryptocurrency price prediction using LSTM/RNN and Random Forest models, deployed as a production-grade Streamlit application.
- Built an interactive dashboard with real-time cryptocurrency selection, multi-step forecasting output, and confidence interval visualization.

TECHNICAL SKILLS

- Languages: C++, JavaScript, C, Python
- Backend: Node.js, Express.js, REST APIs, WebSockets, MongoDB, PostgreSQL, Redis
- Frontend: React, TailwindCSS, Bootstrap, HTML5, CSS3
- Cloud & Tools : AWS, CI/CD, Docker, Postman, Git/GitHub /Streamlit /Hugging face

Core CS: Data Structures & Algorithms, Object-Oriented Programming

ACHIEVEMENTS & CERTIFICATIONS

- LeetCode — Max rating 1500; solved 260+ problems demonstating strong problem solving skills.
- Codeforces — Rating 902 (Pupil); solved 118+ problems with consistent participation in rated competitive programming contests.
- Received Letter of Recommendation from GeeksforGeeks for outstanding leadership as Team Lead, managing campus technical community for 6+ months.
- Infosys Springboard ML Internship — Completed with distinction; built and deployed production ML application recognized by program mentors.
